A rider wearing a yellow helmet and dark riding gear is navigating a rocky, off-road trail on a Yamaha Caballero motorcycle. The motorcycle is white with orange accents and has 'CABALLERO' and '500' visible on the fuel tank. The rider is leaning forward, and the motorcycle is kicking up dust and rocks as it moves through the terrain. The background is a steep, rocky hillside.

**CABALLERO**

## New CABALLERO are EURO5

Fantic improved quality and performance (HP and torque) in 125cc and 500cc displacements, according to Euro5 regulations. Thanks to excellent efforts of Fantic Partners

The 250cc versions at the moment are not Euro5.

## NEW High-tech 125cc EU5 engine by Motori Minarelli with Fantic EFI (electric fuel injection)

EFI Electronic Fuel Injection

Variable Valve Actuation system (next slide)

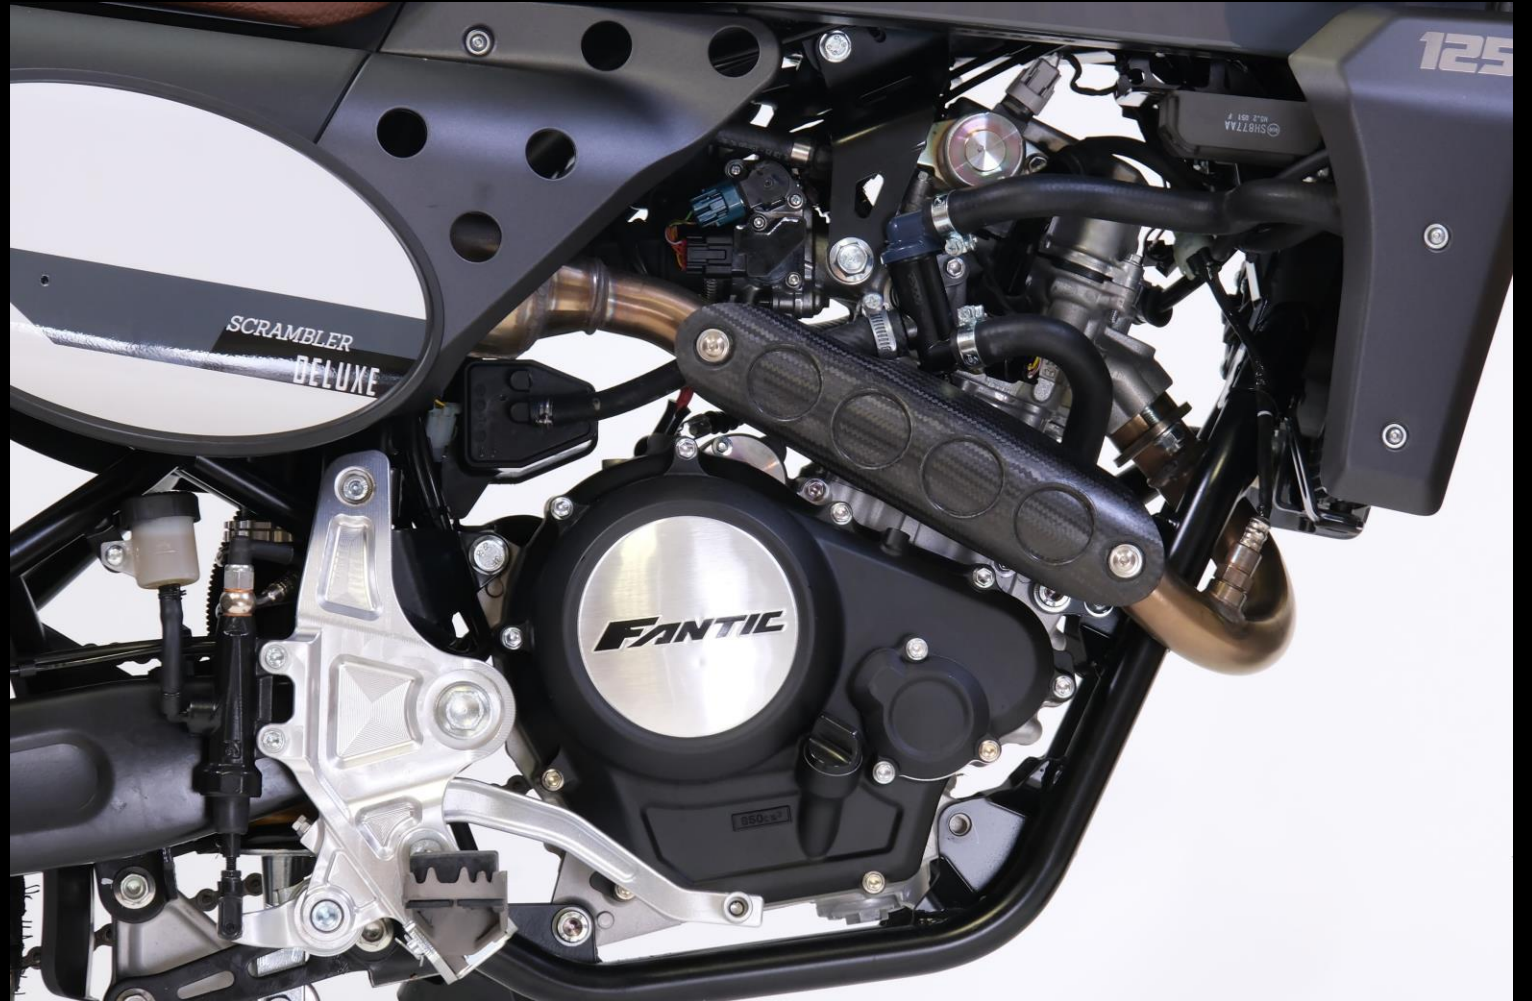

New cylinder head for more efficient combustion: more power, less fuel consumption and less pollution.

Slipper clutch:  
prevents the rear wheel locking when riders decelerate.

High safety level comparable only with competitors high range models.

Improves shifting feeling by reducing clutch friction up to 20%.

Compact crankcase to reduce friction losses and improve efficiency

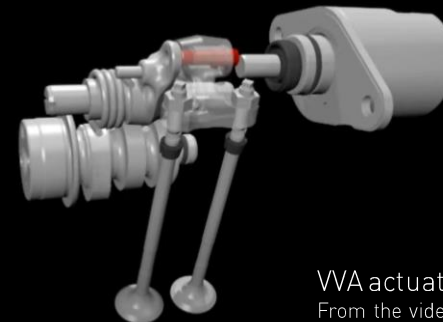

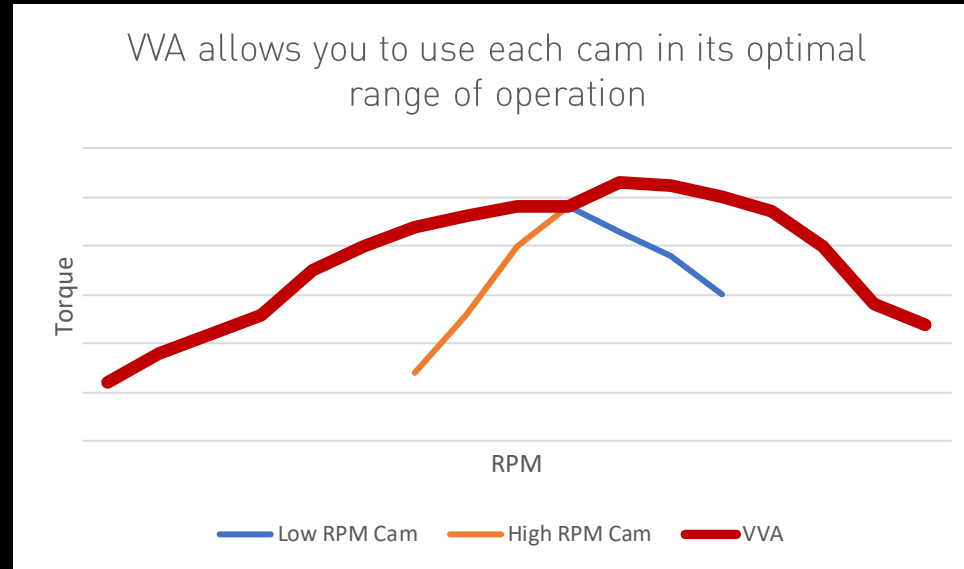

# NEW High-tech 125cc EU5 engine by Motori Minarelli with Fantic EFI (electric fuel injection)

Variable Valve Actuation system = VVA  
Maximum acceleration and the fast ride  
response

The VVA System, thanks to an actuator,  
allows to choose the most efficient and  
performing cam at any speed.  
See side images.

New thermostatic valve provides  
immediate power release

VVA actuator.
