Airoh Helmet

"Airoh nasce per portare la qualità, la sicurezza e l'innovazione di un casco pensato per i campioni on road e off road ad ogni persona che vive le due ruote" A. L.

L'azienda Locatelli S.p.a. è stata fondata 32 anni fa nelle valli bergamasche dall'attuale Presidente e CEO Antonio Locatelli.

"Airoh was born out of the desire of making the quality, safety and innovation of a helmet designed for road and off road champions available to all lovers of two wheels" A. L.

Locatelli S.p.A. was set up 32 years ago in the Bergamo valleys by the current President and CEO, Antonio Locatelli.

La nostra linea di partenza è il 1986, anno di nascita dell'azienda Locatelli S.p.a., per mano di Antonio Locatelli, come azienda produttrice di caschi per noti marchi del settore.

La nostra svolta è il 1997, con la nascita del marchio Airoh Helmet®, che ha condensato 11 anni di competenza e di passione per il mondo della moto in un brand moderno e innovativo per rider più audaci ed esigenti.

La nostra direzione è il mondo, con una presenza del marchio Airoh Helmet® in oltre 80 Paesi e in continua espansione.

Il nostro traguardo è fornire ad ogni campione e ogni appassionato il miglior casco per sicurezza, qualità, estetica e comfort.

In tre decenni sono cambiate molte cose, ma non la passione per la moto e i caschi, portata avanti con costanza dalla famiglia Locatelli. Grazie all'esperienza, alla competenza e alla dedizione, il brand Airoh Helmet® in pochi anni ha raggiunto un'alta notorietà tra gli appassionati, portando la qualità di caschi in 80 Paesi nel mondo attraverso una rete di 2000 business partner.

Nella sua storia Airoh Helmet® ha introdotto più di 100 nuovi modelli e ha registrato un CAGR del 40% negli ultimi 4 anni, accompagnata da un incremento del 15% degli investimenti in R&D.

La famiglia Airoh Helmet® rappresenta tutti gli appassionati di moto: i membri dell'azienda, i piloti professionisti che scendono in pista con Airoh Helmet® e tutti coloro che hanno scelto i nostri caschi per vivere la propria passione.

Many things have changed over the last three decades, but not the Locatelli. Antonio Locatelli founded the company Locatelli S.p.A. in 1986 to produce helmets for established brands of the sector.

1997 marked an important turning point for us, with the establishment of the Airoh Helmet® brand, which condensed 11 years of expertise and passion for motorcycles into a modern and innovative brand for the most daring and demanding riders. Firmly focused on the global market the Airoh Helmet® brand can be found in over 80 countries and is constantly expanding.

Our aim is to provide every champion and every motorcycle enthusiast with the best helmet in terms

of safety, quality, aesthetics and comfort.

The family's passion for motorcycles and helmets. Thanks to experience, expertise and dedication Airoh Helmet® has, in a few years, gained a solid reputation amongst motorcycle enthusiasts.

The company exports its quality helmets in 80 countries across the globe, through a network of 2000 business partners.

Over the years Airoh Helmet® has introduced more than 100 new models and registered a CAGR of 40% in the last 4 years, along with a 15%-increase in R&D investments.

The Airoh Helmet® family represents all motorcycle enthusiasts: the members of the company, the professional riders that race with Airoh Helmet® and all those that have chosen our helmets to live their passion.

85 World Titles

Airoh Helmet

Airoh Helmet® punta sempre al top, tanto nella produzione dei caschi quanto nella selezione dei piloti da sponsorizzare. Vogliamo valorizzare il talento e la passione dei giovani, seguendoli fin dai loro primi passi sulla strada della grandezza e della vittoria: grazie a questo impegno, ad oggi sono 85 i titoli mondiali conquistati sotto il segno di Airoh Helmet®.

Ex piloti e altri esperti del settore, che formano la nostra divisione gara, seguono le principali competizioni on e off road alla ricerca dei campioni di domani: Airoh Helmet® tiene in alta considerazione il talento, la passione e la determinazione che emergono sulla strada ed in mezzo al fango, e che sono la chiave per raggiungere traguardi sempre più importanti.

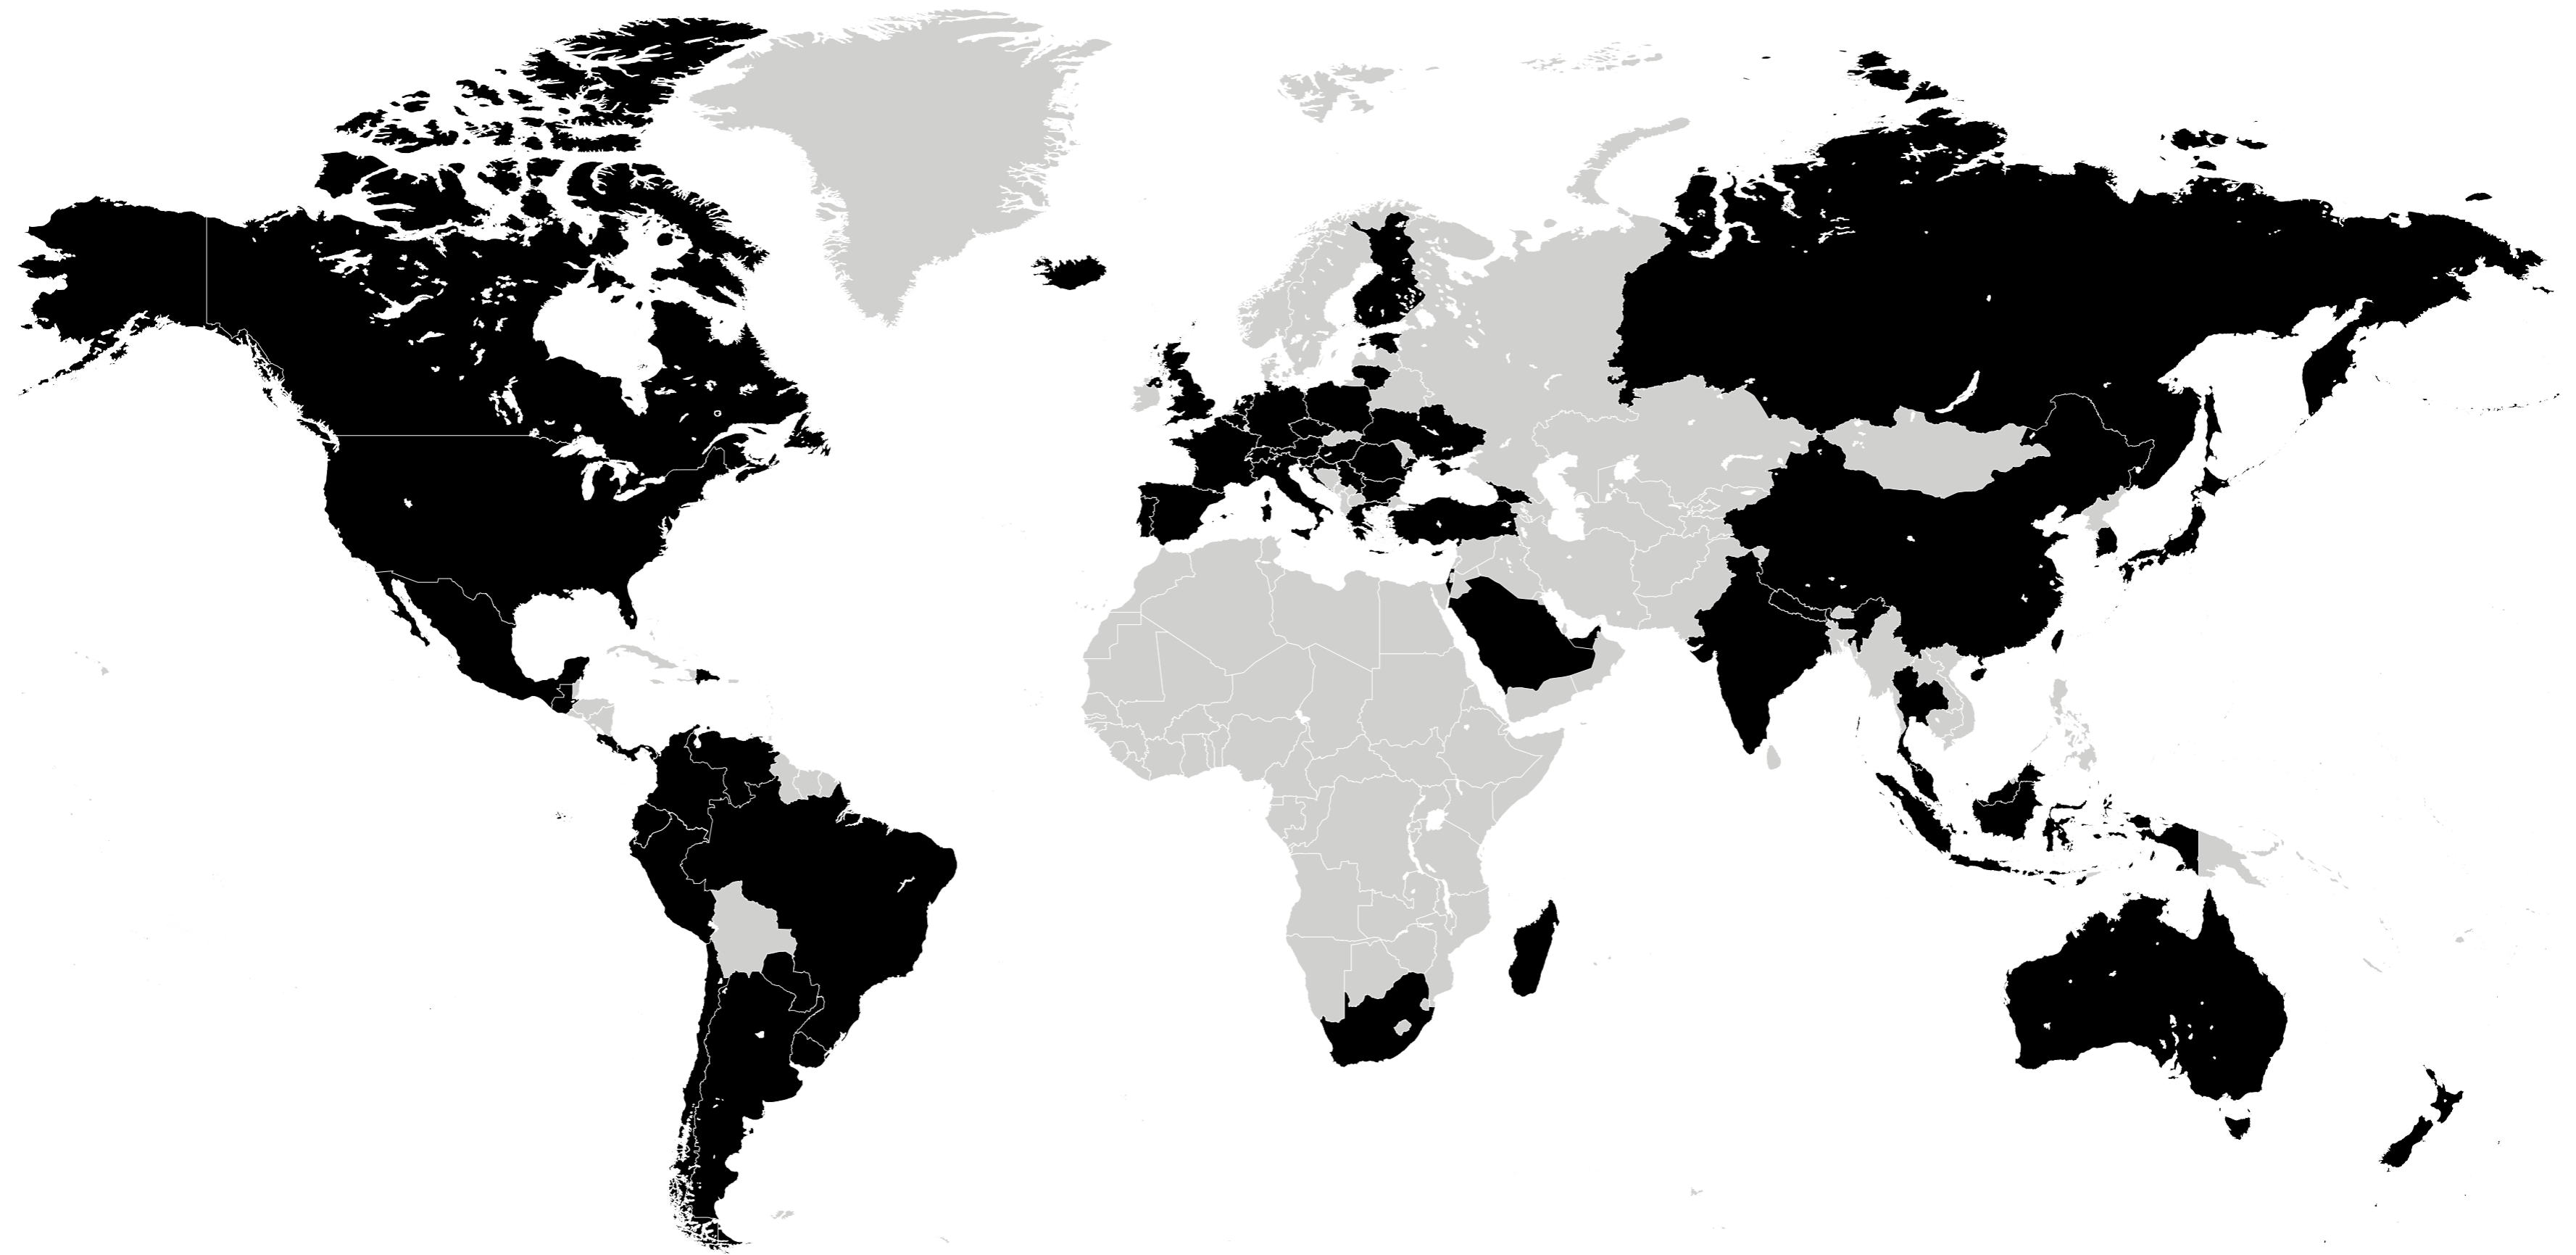

Proviamo una grande soddisfazione nell'accogliere i giovani talenti nella famiglia Airoh Helmet®, offrendo loro il miglior prodotto per sicurezza e performance, ed aiutandoli a diventare grandi campioni: tante sono le nostre storie di successo e di vittoria, come quella di Tony Cairoli, che è in Airoh Helmet® da quando era poco più di un ragazzo e che oggi detiene 9 titoli mondiali.

Airoh Helmet® always aims for the top, either in terms of production or when sponsoring its champions. We want to promote the talent and passion of young riders, by supporting them right from their first steps along the road to greatness and victory. Thanks to our commitment so far Airoh Helmet® has won 85 world titles.

Former riders and other experts forming our race division team follow all the main on and off-road races, seeking for new tomorrow's champions. Airoh Helmet® values the talent, passion and determination that emerge from the road and the mud, and that are the key to reach increasingly important milestones.

We are extremely fulfilled when we can welcome young talents to the Airoh Helmet® family. And we are happy to offer them the best product in terms of safety and performance, and help them become great champions. There are many stories of success and victory, such as Tony Cairoli's, who has been with Airoh Helmet® since he was little more than a boy and who now holds 9 world titles.

Airoh Helmet® è più di un marchio, è un modo di vivere. Realizziamo caschi che permettono ad ogni rider di soddisfare le proprie esigenze e di godere appieno della passione per la moto senza limiti, in completo comfort e sicurezza. Nel DNA di ogni casco Airoh Helmet® c'è:

Sicurezza

L'essenza di un casco è la sicurezza, perciò svolgiamo rigorosi studi e test su tutti i caschi per assicurare il più alto grado di sicurezza.

Innovazione

La nostra tecnologia è in continua evoluzione per garantire la maggiore protezione senza sacrificare il comfort e proporre sempre nuovi modelli per soddisfare le richieste dei rider più esigenti.

Precisione

Ogni casco è curato nei minimi dettagli non solo come dispositivo di sicurezza, ma anche come parte dello stile del rider. Linee decise e aerodinamiche, grafiche moderne e aggressive, colori di impatto: con Airoh Helmet® non passerai mai inosservato.

Passione

Da appassionati per appassionati. Tutti i membri del team Airoh Helmet® si impegnano ogni giorno a realizzare le idee e i sogni di chi vive per le due ruote.

Vittoria

Airoh Helmet® si rivolge ai campioni di oggi e di domani, che vogliono sempre il massimo: dal loro casco, dalla loro moto e da sé stessi, per alzare ogni volta i propri standard.

Airoh Helmet® is more than a brand, it's a way of life. We create helmets that meet the requirements of every rider so that they can fully enjoy their passion for motorbikes without limits and in complete comfort and safety. In every Airoh Helmet® DNA be sure to find:

Safety

The essence of a helmet is safety, therefore we undertake rigorous studies and tests on all our helmets to ensure the highest levels of safety.

Innovation

Our technology is constantly evolving to guarantee maximum protection without sacrificing comfort and to create new models to meet the requests of the most demanding riders.

Precision

Every attention is paid to the smallest detail of the helmet, not only as a safety device, but also as a part of the style of the rider. Sharp and aerodynamic lines, modern and aggressive graphics and striking colours, ensure that with Airoh Helmet® you will never go unnoticed.

Passion

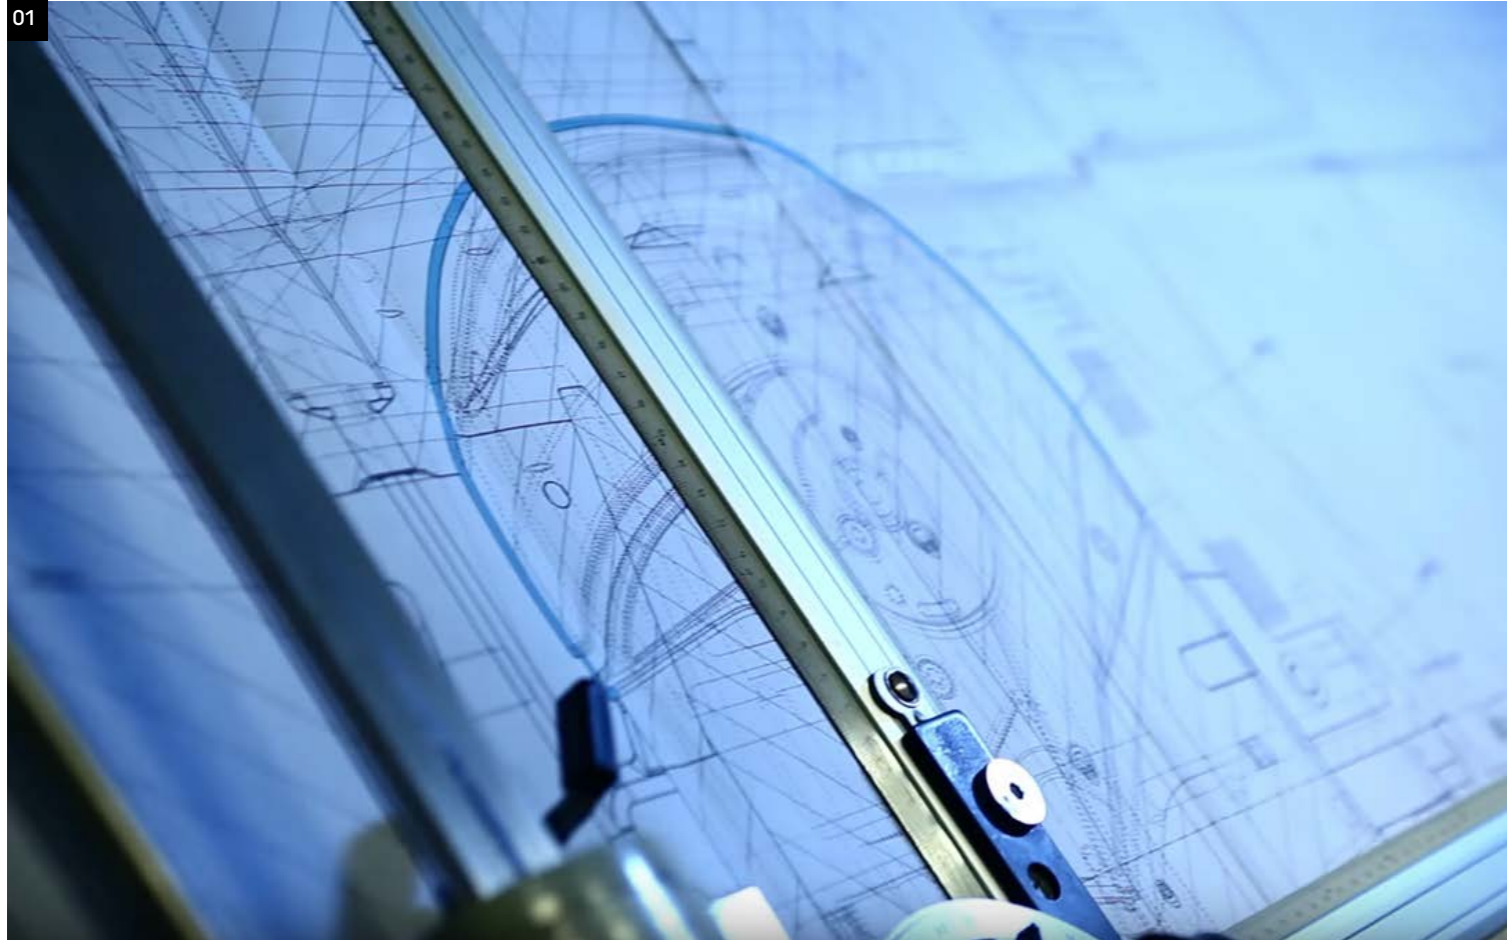

Built by enthusiasts for enthusiasts. All members of the Airoh Helmet® team are committed every day to bringing to life the ideas and dreams of those that live for two wheels.

Victory

Airoh Helmet® is for today's and tomorrow's champions, that always demand the best: from their helmet, their motorcycle and from themselves, so that they can raise their standards every time.

Ogni casco Airoh Helmet® è il frutto degli sforzi combinanti di esperti in campi differenti: designer industriali e ingegneri sono protagonisti nel concretizzare un'idea in un dispositivo di protezione di alta qualità.

Si parte con l'ingegnerizzazione, realizzando un modello 3D del casco e delle sue parti, simulando la capacità di assorbimento degli urti con tecnologia FEM valutando l'aerodinamicità, l'areazione interna e l'ergonomia nella galleria del vento.

Successivamente si passa allo stampaggio delle parti, con processi differenti a seconda del materiale utilizzato: la termoplastica con una sofisticata fusione che impiega speciali stampi ad iniezione; le fibre composite con un metodo artigianale e meticoloso di stratificazione manuale; il polistirolo per le calotte interne con lo stampaggio a vapore ad alte temperature.

In seguito, si procede alla verniciatura o all'applicazione di decals con trattamento filtro UV per aumentare tenuta, resistenza e lucentezza, e all'inserimento degli interni, cuciti a mano per valorizzare i materiali di ultima generazione e garantirne la migliore calzata. Lungo le linee di montaggio vengono assemblati i vari componenti con un processo manuale svolto da personale specializzato, che effettua anche il controllo qualità delle singole parti per scartare quelle con la minima imperfezione. La fase finale e più importante è quella di test, per assicurare l'uniformità ai parametri di sicurezza imposti dalle normative nazionali ed internazionali. Il casco viene segnato in punti specifici, posizionato su una "falsa testa" e fatto cadere da un'altezza di 3 metri su un'incudine; il macchinario che effettua questo processo comunica i dati ad un computer che li traduce ed evidenzia l'Head Injury Criterion (HIC), ovvero una misura delle probabilità di lesioni alla testa derivanti da quell'impatto.

Step 01
Ingegnerizzazione:
realizzazione modello
3D, test su componenti e
valutazione aerodinamica.

Step 02
Stampaggio: realizzazione
componenti con processi
differenti in base al
materiale.

Every Airoh Helmet® is the result of the combined efforts of experts in different fields. Industrial designers and engineers work together to turn an idea into a high quality protection device.

The first product engineering stage consists of creating a 3D model of the helmet and all its parts, in order to simulate the capacity of absorbing impacts with FEM technology. In the wind tunnel we evaluate the aerodynamics, internal venting and ergonomics.

The parts are subsequently moulded with different processes, based on the type of material: thermoplastics use a sophisticated melting process with injection moulds; composite fibres use an artisanal and meticulous approach in manually layering the fibres; the polystyrene for the inner shells uses a steam moulding process at high temperatures.

This is followed by the coating or application of decals, with a UV filter to increase the seal quality, resistance and colour sheen. The interiors inserted are stitched by hand to ensure the optimum quality of the state of the art materials and the most comfortable fit. The various components are assembled along the assembly lines by hand by skilled personnel, who perform a meticulous quality check of the single parts and reject any with the slightest imperfection. The final and most important phase is the testing, where we ensure that each helmet meets the safety parameters set by national and international standards. The helmet is marked in specific points, placed on a dummy head and dropped on an anvil from a height of 3 metres. The machinery that performs this process is connected to a computer that analyses the data and highlights the Head Injury Criterion (HIC), that is the probability of head injuries due to the impact.

Step 01
Product engineering:
construction of a 3D model,
testing components and
aerodynamic evaluation.

Step 02
Moulding: components
are produced with
different processes based
on the material.

Step 03
Verniciatura: decorazione esterna e trattamento a filtro UV, con utilizzo di prodotti ecosostenibili.

Step 04
Montaggio: assemblaggio componenti e controllo qualità su linea di montaggio.

Step 05
Test: valutazione probabilità di lesioni alla testa derivanti da impatto con prova su testa finta.

Step 03
Coating: external decoration and UV filter treatment with ecologically sustainable products.

Step 04
Assembly: components assembly and quality control on the assembly line.

Step 05
Test: evaluation of the probability of head injuries due to impact, with tests on dummy heads.

Helmet Materials

Airoh Helmet® investe molto nella ricerca e selezione dei migliori materiali per le componenti dei suoi caschi: nella progettazione e negli studi ingegneristici vengono considerati quelli che possono garantire il miglior bilanciamento tra capacità di assorbimento degli urti e leggerezza per il comfort di guida. Le linee Airoh Helmet® sono perciò realizzate in tre differenti materiali, scelte di volta in volta in base alle specificità del singolo modello:

100% Carbon Kevlar Fiber: l'intreccio di fibra di carbonio e di kevlar (lo stesso materiale dei giubbotti antiproiettile) con la tecnologia Multiaxial permette di realizzare caschi tanto resistenti quanto leggeri.

HPC (High Performance Composite): la combinazione di tessuti compositi e vetro tramite tecnologia pre-preg permette di raggiungere risultati altamente performanti sia in termini di resistenza che di leggerezza.

HRT (High Resistant Thermoplastic): la resina termoplastica, risultato della combinazione di polimeri di plastica, garantisce alta resistenza ad un peso contenuto.

Airoh Helmet

Airoh Helmet® invests a great deal in researching and selecting the best materials for the helmet components. In the design and the engineering studies we assess the materials that can guarantee the best balance between impact absorption and lightness for riding comfort.

The Airoh Helmet® lines are therefore constructed with three different materials, selected for the specific requirements of each single model:

100% Carbon Kevlar Fiber: weaving together carbon fibre and Kevlar - the same material used for bullet-proof vests - with the Multiaxial technology, allows us to create helmets that are as resistant as they are light.

HPC (High Performance Composite): the combination of composite materials and glass with the pre-preg technology allows us to achieve high performance products in terms of protection and lightness.

HRT (High Resistant Thermoplastic): the thermoplastic resin, which is a combination of plastic polymers, guarantees high impact resistance with a limited weight.

2019 Collection

Airoh Racing

Airoh Helmet® H-Lab è il punto di incontro tra tecnici specializzati e atleti al vertice delle discipline motoristiche, che elaborano i migliori caschi battezzati sui campi di gara. Combinando la competenza tecnica dei nostri ingegneri e designer con l'esperienza vissuta direttamente sul campo da piloti on e off road, Airoh Helmet® è in grado di realizzare caschi al top per sicurezza e performance.

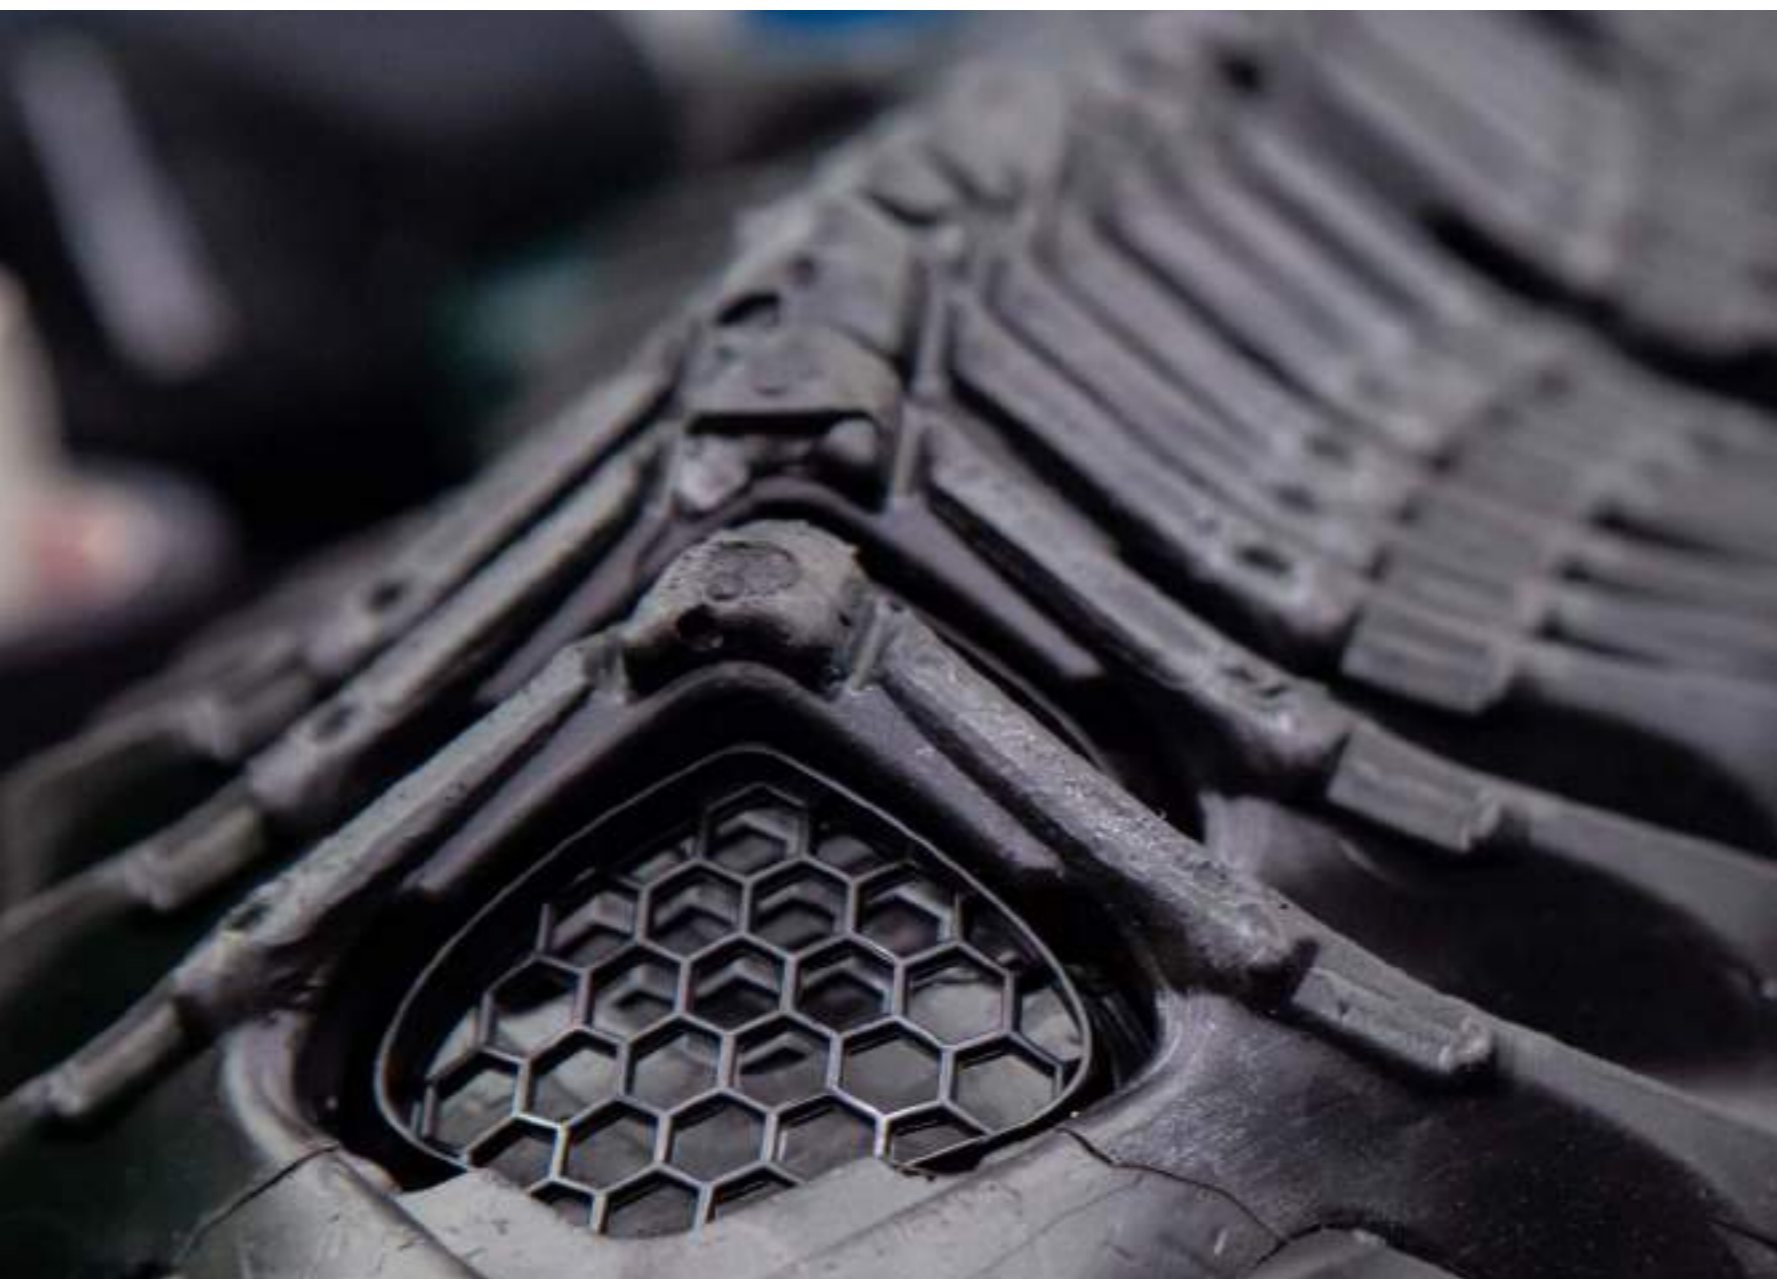

Con test fatti sia in laboratorio che in pista, vengono raccolte le informazioni per realizzare il casco adatto anche ai rider più esigenti: a misura di campione, ma indossabile dagli appassionati di ogni livello, con le stesse caratteristiche altamente performanti del professionista.

"Campioni ed appassionati condividono lo stesso casco e ciò è per noi motivo di grande orgoglio".

The Airoh Helmet® H-Lab is where our specialist technicians and leading motorcycle athletes come together to create the best helmets tested on the race track. By combining the technical expertise of our engineers and designers with the first-hand experience of road and off road riders, Airoh Helmet® is able to create leading edge helmets in terms of safety and performance.

Tests in the laboratory and on the track provide us with the data required to create the best helmets for the most demanding riders. The helmet designed for a champion can be worn by enthusiasts of every level, with the same high-performance specifications of the professional.

"Champions and enthusiasts can wear the same helmet. This is a source of great pride for us".

R&D: Developing Perfection

Airoh Helmet

Per Airoh Helmet®, Ricerca e Sviluppo significa elevare continuamente i nostri risultati: il traguardo di oggi è il punto di partenza di domani per creare qualcosa di ancora migliore.

Siamo alla costante ricerca di nuovi livelli di protezione, comfort e design, capaci di soddisfare tanto gli elevati standard di sicurezza e di qualità del settore, quanto i gusti e le esigenze dei nostri clienti, dal rider neofita al campione affermato.

Per questo motivo, dedichiamo sempre maggiori investimenti nel nostro reparto R&D per sviluppare nuove tecnologie e concretizzare idee innovative: ogni anno produciamo nuovi modelli con sempre al centro la sicurezza e l'esperienza di guida del rider.

Nella nostra continua ricerca della perfezione, abbiamo costruito una galleria del vento all'interno della nostra azienda, per studi approfonditi su aerodinamicità e ventilazione.

Questo ci permette di realizzare design slanciati per incanalare l'aria, ridurre la resistenza, incrementare l'aerazione all'interno del casco e migliorare le performance.

Research and development for Airoh Helmet®, means constantly improving our achievements. Today's goal is tomorrow's starting point to create something that is even better.

We are constantly pursuing new levels of protection, comfort and design, that can meet the high safety and quality standards of the sector, as well as the preferences and requirements of our customers, from novice riders to successful champions.

This is why we assign an increasing amount of investments to our R&D department, in order to develop new technologies and implement innovative ideas. Each year we produce new models focused on safety and rider experience.

In our constant pursuit of perfection we have built an in-house wind tunnel, to carry out in-depth research on aerodynamics and ventilation.

This allows us to create slender designs that channel air, reduce drag, increase the ventilation inside the helmet and improve performance.

Quest'anno gli sforzi del reparto R&D si sono concretizzati nel sistema Airoh Multiaction Safety System (AMS²), un nuovo modo di pensare la calotta protettiva interna.

AMS² è il nuovo brevetto Airoh Helmet[®], che fa il suo debutto con il casco Aviator 2.3.

Questo sistema innovativo utilizza una doppia calotta interna in polistirolo, composta da due calotte sovrapposte e separate da un particolare sistema ad inserti silconici.

Questi elementi silconici permettono alla calotta esterna un movimento che consente, in caso di urto angolare, di assecondare la direzione dell'impatto, smorzando la quantità di energia trasmessa direttamente alla testa di chi indossa il casco.

AMS² è frutto di accurati studi per determinare le dinamiche di incidente più frequenti e, conseguentemente, le caratteristiche degli urti che il casco deve andare ad assorbire, per trovare la risposta più adatta per la sicurezza del rider.

AMS²: una nuova innovazione Made in Airoh Helmet[®] per vivere la passione su due ruote sempre più in sicurezza

This year our R&D efforts have resulted in the Airoh Multiaction Safety System (AMS²), a new way of designing the inner protective shell.

AMS² is the new Airoh Helmet[®] patent, that makes its debut with the Aviator 2.3.

This innovative system uses a double polystyrene inner shell, consisting of two overlaid shells, separated by a unique system of silicone inserts.

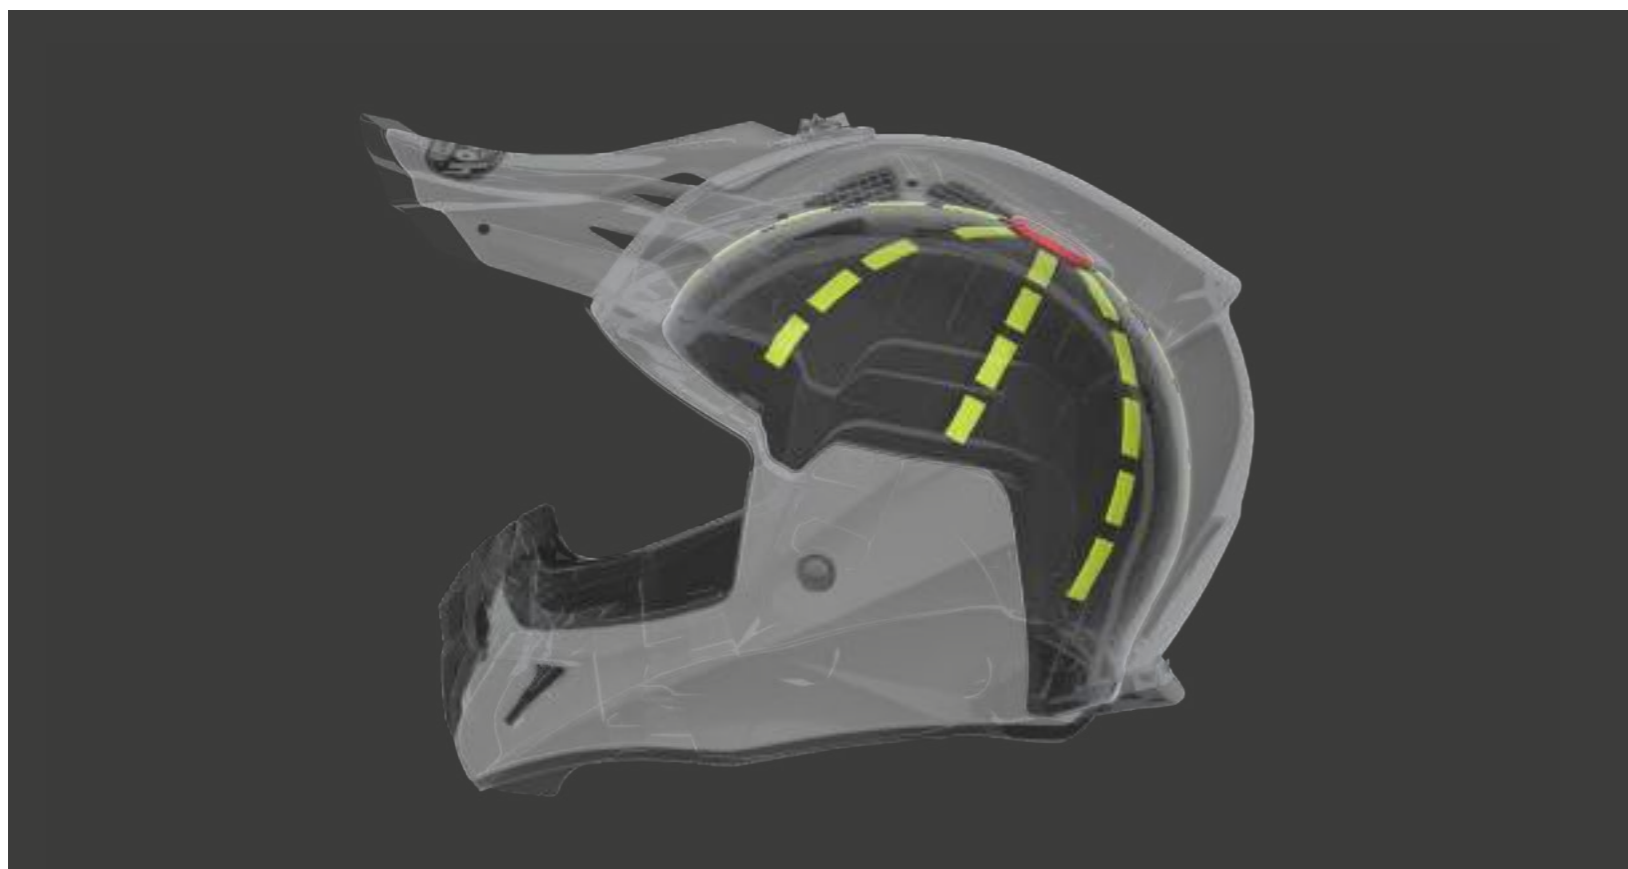

The silicone inserts allow the outer shell to move in case of angular collisions, so that it can follow the direction of the impact, reducing the amount of energy transmitted directly to the head of the rider wearing the helmet.

AMS² is the result of in-depth studies to determine the most frequent dynamics in accidents and, consequently, the characteristics of the collisions that a helmet has to absorb, to find the most suitable solution for a rider's safety.

AMS²: the latest Airoh Helmet[®] innovation lets you live your passion for two wheels with increased levels of safety.

AMS²

0026

0027

1. Nessun casco può proteggere contro tutti i possibili impatti, sia a basse velocità che ad alte velocità.

2. Prima di utilizzare il casco, regolare e chiudere il sistema di chiusura.

3. I caschi sono stati concepiti per assorbire un solo impatto.

4. Pulire il proprio casco con molta attenzione.

5. Non modificare il proprio casco.

6. Non maltrattare il proprio casco.

7. Non ridipingere il proprio casco.

8. Verificare sempre il casco prima di indossarlo.

9. Mantenere sempre la visiera in buone condizioni.

1. No helmet can protect you from all possible impacts, either at low speeds or high speeds.

2. Before using the helmet, adjust and close the retention system.

3. Helmets are designed to absorb only one impact.

4. Clean your helmet very carefully.

5. Do not modify your helmet.

6. Do not tamper with your helmet.

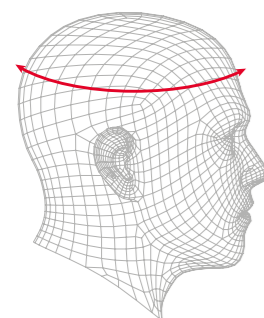

7. Do not repaint your helmet.

8. Always check the helmet before wearing it.

9. Always keep the visors in good condition.

Come misurare la circonferenza cranica per poter scegliere la taglia corretta del proprio casco:

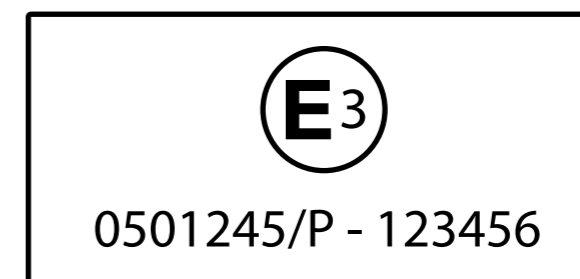

How to measure the head circumference in order to choose the right size of your helmet:

Taglie Adulti Adult Sizes	XS	S	M	L	XL	XXL	XXXL
Circonferenza* Circumference**	53-54	55-56	57-58	59-60	61-62	63-64	65
Taglie Bambini Children's Sizes	XXS	XS	S				
Circonferenza* Circumference**	51-52	53-54	55-56				

* variabile a seconda del modello di casco

**depending on the model

OMOLOGAZIONI

Scopri l'etichetta omologativa dei caschi

Il casco è un dispositivo di sicurezza e come tale bisogna essere informati sulle rigide norme omologative. Conoscere il proprio casco è importante: l'etichetta che trovate cucita su ogni cinturino può darci molte informazioni utili sulla fabbricazione del casco stesso e sulle sue caratteristiche ai fini di un utilizzo corretto.

L'etichetta è una vera e propria carta d'identità e vi consigliamo di non acquistare caschi privi di etichetta! L'omologazione di ogni casco viene concessa solo ai caschi che soddisfano la normativa ECE 22-05 e che quindi sono considerati sicuri e omologati per l'utilizzo in tutta la U.E. La disposizione degli elementi all'interno dell'etichetta può variare ma deve assolutamente indicare una serie di valori.

Ecco un breve focus:

E: indica l'omologazione europea. Il casco quindi può essere utilizzato nei paesi U.E.

3: indica il paese in cui è stata realizzata l'omologazione. In questo caso ITALIA

05: indica la versione dell'omologazione ECE. Può essere 03 - 04 - 05; La versione 05 indica la versione più recente

01245 indica il numero dell'omologazione

/P indica il tipo di protezione e può essere così suddiviso:

1 /NP non protettivo: caschi dotati di mentoniera asportabile o reclinabile. Non protettiva

2 /J casco jet o Demi jet Privo di mentoniera

3 /P Caschi modulari/Crossover con MENTONIERA PROTETTIVA che può essere indifferentemente chiusa o aperta

4 /P-J Caschi/Modulari Crossover con MENTONIERA PROTETTIVA CHE può essere utilizzata indifferentemente chiusa o aperta

.123456 indica il numero di matricola o di produzione del casco

Prima di acquistare un casco controllate sempre la presenza e la completezza dell'etichetta di omologazione. Si tratta del vostro casco e della vostra sicurezza, pensateci sempre bene!

HOMOLOGATIONS

Discover the helmets homologation label

The helmet is a safety device and for this reason the helmet user must be informed about the strict homologation standards. Knowing your helmet is important: the label, that you found sewn on each strap, can give us lots of useful information on the manufacture and features of the helmet for a proper use. The label is a real ID card and we recommend to not buy helmets unlabelled!

The Homologation of each helmet is granted only to helmets that respect the ECE 22-05 regulation and that they are considered safe and homologated for use in all U.E. The arrangement of the elements within the label can transform but it must definitely indicate a range of values.

Here is a brief focus:

E: indicates the European homologation. You can use the helmet in the European countries.

3: indicates the country which realized the homologation. In this case Italy

05: indicates the homologation ECE version. It can be 03 - 04 - 05; The 05 indicates the version most recent

01245: indicates the homologation number

/P indicates the type of protection and it can be divided as follows:

1 /NP NO protective: helmets with removable or reclining chin guard. no protective

2 /J Jet o Demi jet Helmets without protective chin guard

3 /P modular/Crossover Helmets with PROTECTIVE CHIN GUARD (it can be opened or closed indifferently)

4 /P-J modular/Crossover Helmets with PROTECTIVE CHIN GUARD (it can be opened or closed indifferently)

.123456 indicates the matriculation number or the progressive production number

Before buying a helmet, check always the presence and completeness of the homologation label. It's your helmet and your safety, pay always attention!

03

Full face, full power, full comfort: Gp 500 è studiato e realizzato per poterti concentrare al 100% sulla strada di fronte a te. Sviluppato in collaborazione tra piloti da corsa e i nostri tecnici, Gp 500 condensa tutte le caratteristiche che un rider esigente desidera e merita: tre misure di calotte tra cui scegliere, High Performance Composite (HPC), visiera omologata 50% fumé, 10 prese d'aria, lente Pinlock® e stop wind.

La sicurezza è garantita dall'utilizzo di materiali nobili e dall'Airoh® Emergency Fast Remove (A.E.F.R.) per la rimozione rapida dei guanciali in caso di emergenza.

Per adattarsi alle esigenze di ogni rider, sono disponibili come accessori varie versioni della visiera (clear, dark smoke, silver mirrored, gold, iridium e blu) e il kit per la sua predisposizione sia Tear Off che Pinlock®.

Full face, full power, full comfort: GP 500 has been designed and created to let you concentrate 100% on the road in front of you. Developed with the combined efforts of racing motorcyclists and our technicians, the GP 500 brings together all the specifications that demanding riders want and deserve.

Three different shell sizes, High Performance Composite fibre (HPC), type-tested 50% smoke visor, 10 vents, Pinlock® lens and Stop Wind system. Safety is guaranteed by the use of first-rate materials and the Airoh® Emergency Fast Remove (A.E.F.R.) system, that allows the quick removal of the cheek pads in emergency situations.

In order to meet the requirements of every rider the helmet accessories include various versions of the visor (clear, dark smoke, silver mirrored, gold, iridium and blue) as well as the kit for using the Tear Off and Pinlock® systems.

01. Visiera omologata 50% fumé per bilanciare visione e protezione dal sole. **02.** Sistema d'emergenza per la rimozione rapida dei guanciali (A.E.F.R.) **03.** Predisposizione per montaggio di visiera Tear Off con perni esterni.

01. Type-approved 50% smoke lens ensures a balanced vision and sun protection. **02.** Emergency cheek pads quick removal system (A.E.F.R.) **03.** The helmet is equipped with external pins for Tear Off visors.

GP511

Andare oltre, percorrere quel chilometro in più, accelerare ancora una volta: con questo spirito è nato il casco Full-Face St 501, l'unione di racing e touring.

Disponibile in due diverse misure per la calotta (XS-S-M o L-XL-XXL), St 501 è realizzato all'esterno in HPC e all'interno con EPS in quattro densità differenti: la combinazione di questi materiali permette di garantire una massima sicurezza condensata in 1400 grammi.

Il peso contenuto di questo casco Full-Face è uno dei tanti elementi studiati per il comfort e il piacere della guida: sistema di ventilazione studiato per canalizzare l'aria all'interno del casco e fornire un'elevata ventilazione anche nei mesi più caldi, la visiera extra-wide per un ampio campo visivo e un pack di accessori che, oltre al Visierino Solare a scomparsa, allo Stop Wind e alla lente

Pinlock® include varie versioni di visiere per adattarsi ad ogni stile di guida.

Linee aerodinamiche, design moderno, stile aggressivo, grafiche ad impatto: St 501 non passa inosservato, infondendo in un casco Full-Face un'ardente anima Racing.

The desire to go the extra mile and twist the throttle one more time are the spirit behind the full-face ST 501 helmet, bringing together racing and touring.

Available in two different shell sizes (XS-S-M or L-XL-XXL), the ST 501 features an outer shell in High Performance Composite fibre (HPC) and an inner EPS shell in four different densities. The combination of these materials allows us to condense maximum safety levels in just 1400 grams. The low weight is just one of the many elements of this Full-Face

helmet, designed to ensure comfort and riding pleasure, such as the ventilation system that channels air inside the helmet to keep it cool even in the hottest months, the extra-wide visor that provides a wide field of vision and an accessories pack that, as well as the retractable sun visor, the Stop Wind and the Pinlock® lens, includes the various visor versions to adapt to every riding style.

Aerodynamic lines, modern design, aggressive style and striking graphics. By infusing a full-face helmet with a fiery racing soul, the ST 501 cannot pass unnoticed.

È sempre il momento di andare in moto con St 301, il casco full-face studiato per fronteggiare ogni condizione della strada, sia per il touring che per lo sport: la combinazione di materiali e di tecnologie garantiscono massimi livelli di sicurezza, protezione e comfort.

La calotta in HRT garantisce un'elevata resistenza ad un peso contenuto di 1470 +- 50 gr, mentre il sistema di areazione permette una ventilazione ottimale.

St 301 è pronto ad ogni sfida che la natura può lanciargli grazie alla visiera solare a scomparsa, al posizionamento della visiera che previene l'appannamento, all'ampio campo visivo per il controllo della strada e la sicurezza attiva, e allo Stop Wind e alla lente Pinlock®.

Il design sportivo, la linea moderna, le grafiche audaci e i colori d'impatto sono

pensati con la stessa filosofia del resto del casco, per emergere e risaltare in ogni situazione.

It's always time to ride with the ST 301, a full-face helmet designed to withstand every road condition, both for touring and racing. The combination of materials and technologies guarantees maximum levels of safety, protection and comfort.

The High Resistant Thermoplastic (HRT) shell provides a high level of protection with a low weight of 1470 +- 50gr, whilst the ventilation system provides optimal coolness.

The ST 301 is ready for any challenge that nature can throw its way thanks to the retractable sun visor, the position of the visor that prevents internal fogging, the wide field of vision to monitor the road and increase active safety, the Stop

Wind system and the Pinlock® lens. The sporting design, the modern lines, the daring graphics and the striking colours have been designed with the same philosophy as the rest of the helmet, to stand out from the crowd in every situation.

01. Sistema anti-appannamento e stopwind per ogni condizione meteo. **02.** Visiera solare a scomparsa con meccanismo di controllo interno. **03.** Visiera extra-wide ad ampio campo visivo per la sicurezza attiva.

01. Anti-fogging and Wind Stop systems for every weather condition. **02.** Retractable sun visor with internal control mechanism. **03.** The Extra-Wide visor provides a wide field of view for increased active safety.

Grande coraggio e audacia su ogni strada: in una parola Valor, il casco Full-Face per chi non riesce a separarsi dalle moto sportive.

La calotta in HRT è stata modellata seguendo linee giovani, moderne, dinamiche ed aerodinamiche, in una combinazione unica accompagnata da grafiche cariche di carisma e di personalità, adatte ad ogni gusto e stile per lasciare un segno deciso.

Il sistema di ventilazione a otto zone per incanalare l'aria e la visiera Extra-Wide ti permettono di essere tutt'uno con il vento, la moto e la strada, e di godere della massima resistenza grazie ai materiali della calotta esterna, disponibile in due calotte (XS-S-M o L-XL-XXL).

Valor è completato dalla predisposizione per la lente Pinlock®, lo Stop Wind e gli interni estraibili e lavabili, a cui si possono aggiungere diverse versioni di visiera: light smoke, dark smoke, silver mirrored, gold, iridium e blue.

Mostra il tuo valore su strada.

For those that live for bravery and daring on every road, Valor is a full-face helmet for sports riders.

The High Resistant Thermoplastic (HRT) shell has been designed with a youthful, modern, dynamic and aerodynamic approach, in a unique package, and finished off with distinctive and charismatic graphics that meet every preference and style and leave a striking mark.

The 8-zone ventilation system that channels the air and the Extra-Wide visor ensure that you are at one with the wind, motorcycle and road, and enjoy maximum protection thanks to the materials of the outer shell, available in two sizes (XS-S-M or L-XL-XXL).

Valor, designed for fitting Pinlock® lenses, also features the Stop Wind system, removable and washable inner linings as well as the possibility of changing the visor: light smoke, dark smoke, silver mirrored, gold, iridium and blue.

Show your worth on the road.

Sempre pronto con Rev 19, il casco Flip-Up per eccellenza di Airoh Helmet® che combina la versione integrale e la versione jet in un unico modello dinamico e moderno, capace di adattarsi ad ogni condizione di guida e ad ogni esigenza di sicurezza e di comfort.

Questo modello 2-in-1 in termoplastica integra il meglio di entrambi i caschi, come la visiera Extra Wide per una migliore sicurezza attiva, la visiera parasole a scomparsa, Pinlock®, Stop Wind e predisposizione per il montaggio dei sistemi Bluetooth.

La versatilità di Rev 19 è garantita dal sistema brevettato di rotazione del mentone a 180° e dalla doppia

omologazione P/J, per passare con rapidità e semplicità da jet a integrale e viceversa: la rev-olution del casco modulare.

You're always ready with the REV 19, Airoh Helmet's® flip-up helmet, that combines full-face and jet versatility in a dynamic and contemporary model, designed to meet all riding conditions and every safety and comfort requirement.

This 2-in-1 thermoplastic model marries the best aspects of both helmets, such as the Extra Wide visor for improved active safety, the retractable sun visor, Pinlock®, Stop Wind and the possibility of connecting Bluetooth systems.

The versatility of the REV 19 is guaranteed by the patented 180° chin-guard rotation system and the double P/J certification to easily and simply switch from jet to full-face. A veritable REV-olution for modular helmets.

01. Sistema di ventilazione ottimizzato. **02.** Modalità jet e integrale con doppia omologazione P/J. **03.** Sistema di rotazione del mentone a 180° per Flip up.

01. Optimised ventilation system. **02.** Jet and full-face configuration with double P/J certification. **03.** 180° chin-guard rotation system for flip-up mode.

MODULAR LINE

EXECUTIVE

Airoh Helmet
2019 Collection

MODULAR LINE

Il rider deciso sa a cosa puntare: Il cuore pulsante di Executive è il sistema brevettato Chin-Guard Holder System (C.H.S.), che permette di sganciare la mentoniera con la semplice pressione di due tasti laterali e di alloggiarla sul retro della calotta, integrandosi con il design del casco in maniera elegante e naturale: da stradale a jet e viceversa, in pochi passaggi.

Come casco modulare in HRT, è accompagnato dalla doppia omologazione P/J e vanta ulteriori caratteristiche quali il visierino solare a scomparsa, l'alloggiamento interno per lo stop wind e la lente Pinlock®.

Le qualità di Executive sono state riconosciute dalla rivista tedesca Touren-Fahrer, che ha promosso le sue eccezionali performance nella categoria dei caschi modulari.

Designed for discerning riders that know what they want. The beating heart of the Executive is the patented Chin-Guard Holder System (C.H.S.), that lets you release the chin-guard by simply pressing two side buttons and fit it at the back of the shell, integrating elegantly and naturally with the design of the helmet. From on-road to jet in a few simple steps.

This modular High Resistant Thermoplastic (HRT) helmet, includes the double P/J certification as well as further features such as the retractable sun visor, the internal housing for the Stop Wind and the Pinlock® lens.

The excellent performance and quality of Executive have been awarded by the German magazine Touren-Fahrer, which has promoted its excellent performance into the modular helmet category.

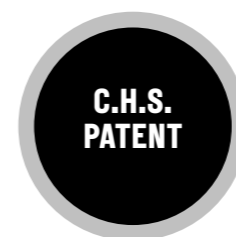

01. Sistema brevettato Chin-Guard Holder System (C.H.S.).
02. Modalità jet e integrale con doppia omologazione P/J.
03. Visiera solare a scomparsa con meccanismo di controllo interno.

01. Patented Chin-Guard Holder System (C.H.S.). **02.** Jet and full-face configuration with double P/J certification **03.** Retractable sun visor with internal control mechanism.

ON - OFF

01

02

03

Il rider che vuole dominare ogni situazione cerca Commander, l'ultima evoluzione dei caschi ON/OFF di Airoh Helmet®.

Sia su strada che fuori strada con Commander potrai andare esattamente dove vuoi grazie ad una progettazione innovativa: potrai cambiare con facilità la configurazione del casco, passando dalla combinazione di frontino e visiera per un percorso Off road, alla modalità naked senza frontino e con la visiera per sfrecciare sull'asfalto.

Commander concentra il meglio del design e della tecnologia di Airoh Helmet®, per ridefinire gli standard ed elevarsi dove altri non osano arrivare: calotta in HPC, visiera Extra Wide con visierino solare a scomparsa, lente Pinlock®, frontino aerodinamico, areazione a tre zone, alloggiamento per Bluetooth, due

dimensioni di calotta esterna e varietà di grafiche dal forte impatto visivo.

Riders that want to dominate every situation need look no further than the Commander: the latest evolution of Airoh Helmet's® ON/OFF helmets.

The Commander's innovative design lets you go wherever you want, by easily changing the configuration of the helmet, from peak and visor for off-road use to a more naked look, with no peak and visor for road use.

All the latest Airoh Helmet® design and technology come together in the Commander, to redefine the standards and achieve performance levels that others cannot match: High Performance Composite fibre (HPC) shell, Extra Wide visor with retractable sun visor, Pinlock® lens, aerodynamic peak, three-zone

ventilation, Bluetooth housing, two sizes of outer shells and a wide range of striking graphics.

01. Modalità on e off road con combinazioni di frontino e visiera. **02.** Visiera solare a scomparsa con meccanismo di controllo interno. **03.** Visiera extra-wide ad ampio campo visivo per la sicurezza attiva.

01. On-road and off-road mode with combinations of peak and visor. **02.** Retractable sun visor with internal control mechanism. **03.** The Extra-Wide visor provides a wide field of view for increased active safety.

Trr S è il punto d'incontro tra professionisti ed appassionati, on road e off road, comfort e sicurezza.

La calotta in HPC (disponibile in due differenti misure XS-S-M o L-XL-XXL) permette di realizzare un casco che riesce ad essere contemporaneamente resistente e leggero, con un peso di soli 850 grammi.

Il sistema di areazione con coperture rimovibili delle prese d'aria, gli interni estraibili e lavabili sono caratteristiche di Trr S pensate per creare un comfort a 360° unite alle grafiche aggressive ne fanno un casco dal design moderno.

Trr S is the meeting point between professionals and enthusiasts, on-road and off-road, comfort and safety.

The High Performance Composite fibre (HPC) shell (available in two different sizes XS-S-M or L-XL-XXL) allows us to create a helmet that is at the same time resistant and light, with a weight of only 850 grams.

The ventilation system with removable vent covers and the removable and washable lining are just some of the features designed to achieve maximum comfort. The Trr s is complete with aggressive graphics for a contemporary design.

La strada è il tuo dominio, il tuo terreno per la caccia di emozioni che potrai fare tue grazie a Hunter.

Questo casco realizzato in HPC con tre misure differenti di calotta esterna (XS-S-MS, MC-L, XL-XXL-XXXL) lo rendono estremamente resistente ed al contempo tra i più leggeri presenti sul mercato nel suo segmento (1250 grammi) grazie a materiali di ultima generazione.

La leggerezza, la visiera Extra Wide, il design moderno ed aerodinamico, le prese di ventilazione, il visierino parasole a scomparsa e la predisposizione per la lente Pinlock® enfatizzano il piacere della

guida in totale sicurezza sia in città che sulle strade extra-urbane.

The road is your domain and your hunting ground for emotions that you can live with your Hunter.

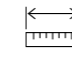

This High Performance Composite fibre (HPC) helmet, available with an outer shell in three different sizes (XS-S-MS, MC-L, XL-XXL-XXXL), is extremely resistant and at the same time amongst the lightest helmets available in the market for its segment (1250 grams), thanks to latest generation materials employed.

The light weight, Extra Wide visor, modern and aerodynamic design, ventilation vents, retractable sun visor and the possibility of attaching Pinlock® lenses, emphasize the pleasure of riding in the city and the countryside.

01. Sistema di ventilazione con prese multiple per areazione interna. **02.** Visiera solare a scomparsa con meccanismo di controllo interno. **03.** Visiera extra-wide ad ampio campo visivo per la sicurezza attiva.

01. Use of materials to minimise weight and maximise protection. **02.** Retractable sun visor with internal control mechanism. **03.** The Extra-Wide visor provides a wide field of view for increased active safety.

URBAN JET

Il casco in HRT ideale per chi vuole dominare la città senza rinunciare al design, grazie alle caratteristiche innovative di questo modello jet.

La visiera, il visierino solare a scomparsa, la chiusura micrometrica ed il sistema di ventilazione forniscono tutto il necessario per il rider cittadino e non solo.

Disponibile in due misure di calotta (XS-S-M o L-XL) e un'ampia gamma di grafiche, City One potrà soddisfare i gusti e le esigenze di tutti.

City One is the ideal High Resistant Thermoplastic (HRT) jet helmet for city riders that demand stylish design with innovative features.

The visor, retractable sun visor, micrometric retention system and the ventilation system provide all the requirements for city riders that also want to go on longer trips.

Available in two shell sizes (XS-S-M or L-XL) and a wide range of graphics, City One meets the tastes and requirements of everyone.

01. Sistema di ventilazione con prese multiple per areazione interna. **02.** Visiera solare a scomparsa con meccanismo di controllo interno. **03.** Sistema Micrometrico.

01. Optimised ventilation system for internal cooling. **02.** Retractable sun visor with internal control mechanism. **03.** Customisable chin strap with micrometric retention system.

01. Sistema brevettato AMS² per protezione avanzata contro gli impatti angolari **02.** Sistema d'emergenza per la rimozione rapida dei guanciali (A.E.F.R.) **03.** Agganci magnetici delle componenti interne.

01. Patented AMS² system for advanced protection against angular impacts. **02.** Emergency cheek pads quick removal system (A.E.F.R.) **03.** Magnetic couplings of the inner parts.

03

I veri campioni non si fermano mai, c'è sempre un nuovo traguardo da tagliare, una nuova sfida da vincere, una nuova pista su cui correre.

Aviator 2.3 AMS² (Airoh Multiaction Safety System) è la nuova versione della linea di caschi Off Road che introduce importanti innovazioni tecnologiche (patented by Airoh) che migliorano tanto l'esperienza di guida quanto la sicurezza del rider: sintesi di tutto il know-how di Airoh Helmet®, è un modello unico al mondo che ridefinisce gli standard di comfort, traspirabilità e protezione.

La totale sicurezza offerta dal Carbon Kevlar, materiale che minimizza il peso e massimizza la resistenza, è affiancata da due sistemi brevettati da Airoh Helmet®: A.E.F.R. per la rimozione rapida dei guanciali e AMS², il più avanzato ritrovato per la protezione contro gli impatti angolari, che fa il suo debutto nelle linee Airoh Helmet® proprio con Aviator 2.3.

Altra importante novità della versione 2.3 è costituita dal sistema di aggancio magnetico degli interni, che permette tanto un blocco nella loro posizione quanto una facile rimozione quando desiderato.

Una nuova gamma di grafiche e colorazioni cariche di grinta e di carisma fanno risaltare Aviator 2.3 in ogni situazione. L'ampio campo visivo,

il sistema di ventilazione con presa d'aria frontali, superiori, posteriori e sul mentone, completa l'evoluzione del nuovo Aviator.

True champions never rest, there is always a new finish line to cross, a new challenge to overcome and a new track to race.

Aviator 2.3 AMS² (Airoh Multiaction Safety System) is the new version of the Off Road helmets line, that introduces important technological innovations (patented by Airoh) and brings significant improvements to the riding experience as well rider safety. The result of all Airoh Helmet's® know-how, it is a unique model in the world that redefines the standards of comfort, breathability and protection.

The total safety of Carbon Kevlar, a material that reduces weight whilst maximising protection, is paired with two systems patented by Airoh Helmet®: A.E.F.R. for the quick removal of cheek pads and AMS² is the most advanced system ensuring protection against angular impacts. It makes its debut in the Airoh Helmet® range with Aviator 2.3 model.

Another important aspect of the 2.3 version consists of the magnetic fastening system for the liners, that ensures a perfect lock in position as well as an easy removal.

The Aviator 2.3 will stand out in every situation with a new range of striking and

OFF ROAD

Aviator 2.2 è il casco per chi vive fuori strada, tra il fango e la polvere, superando ostacoli e provando il brivido ad ogni curva: professionista o appassionato, troverà tutte le caratteristiche per soddisfare la propria passione per l'Off Road, in un concentrato di tecnologia e di design.

Aviator 2.2 è un modello dagli alti livelli di comfort, traspirabilità e protezione, studiato per i campioni e offerto a tutti i rider che amano l'Off Road in un'ampia varietà di grafiche aggressive, moderne, carismatiche ed energiche. Ogni sfida viene affrontata in totale sicurezza, grazie al Carbon Kevlar, materiale nobile altamente performante, che offre un'assoluta resistenza accompagnata dalla massima leggerezza, con un peso di appena 990 grammi; ulteriori garanzie di sicurezza vengono offerte dal sistema per la rimozione rapida dei guanciali A.E.F.R e dall'ampio campo visivo per un maggior grado di sicurezza attiva.

Due differenti misure di calotta (XS-S-M o L-XL) permettono al rider di trovare il giusto comfort. Il sistema di ventilazione che combina prese d'aria frontali, superiori, posteriori e sul mentone ed il frontino con due prolunghe, forniscono il giusto comfort in ogni situazione.

Aviator 2.2 è la scelta di campioni come Tony Cairoli, con disponibili le grafiche da lui indossate in gara.

Aviator 2.2 is the helmet for those that live off road, amongst the mud and dust, overcoming obstacles and finding thrills at every turn. Professionals and enthusiasts alike will find all the technological and design features to fulfil their off-road passion.

Designed for champions and available to all riders that love riding off-road, Aviator 2.2 provides top of the range levels of comfort, breathability and protection in a wide variety of aggressive, modern, charismatic and dynamic graphics.

Riders can face up to any challenge in total safety, thanks to the Carbon Kevlar, a high-performance material that offers absolute protection with maximum lightness, in a weight of just 990 grams. For ultimate safety the helmet includes the A.E.F.R. system for the quick removal of the cheek pads and a wide field of view for increased active safety.

Two different sizes of shell (XS-S-M or L-XL) ensure that all riders can find the right level of comfort. The ventilation system, that combines front, top, rear and chin guard vents and the peak with two extensions, provide the right level of comfort in every situation.

Aviator 2.2, the choice of champions like Tony Cairoli, is available in Tony's racing graphics.

Nessun ostacolo può fermarti con Terminator Open Vision, il nuovo casco Off Road di Airoh Helmet® per i rider che si sentono vivi solo tra il fango e la polvere.

Terminator Open Vision è realizzato HPC che permette la realizzazione di un casco leggero ed altamente resistente, per affrontare anche i percorsi più impervi in totale sicurezza. Il sistema per la rimozione rapida dei guanciali A.E.F.R ed il sistema di ritenzione con anelli a doppia D completano il casco.

Grafiche aggressive, linee moderne e dinamiche, due misure di calotta (XS-S-M o L-XL-XXL) e frontino allungato ne esaltano le caratteristiche estetiche; il sistema di ventilazione con prese d'aria frontali, posteriore e sul mentone, filtri antipolvere, interni estraibili e lavabili completano il comfort di Terminator Open Vision.

Pratico, leggero, sicuro, deciso e impossibile da non notare: ecco come riassumere Terminator Open Vision.

Nothing can stop you with the Terminator Open Vision, the new off-road helmet by Airoh Helmet® for riders that come to life in the mud and dust.

Terminator Open Vision is constructed in High Performance Composite fibre (HPC) to create a light and extremely protective helmet, to meet to most demanding tracks in total safety. Other key features are the A.E.F.R. system for the quick removal of the cheek pads and the double D-ring retention system.

Aggressive graphics, modern and dynamic lines, two shell sizes (XS-S-M or L-XL-XXL) and an extended peak complete the package, whilst the ventilation system with front, rear and chin guard vents, dust filters, removable and washable inner lining, ensure the optimum comfort of the Terminator Open Vision.

Terminator Open Vision is practical, light, safe, determined and stands out from the crowd.

Twist è il casco per affrontare i percorsi off road più indomabili, in totale sicurezza e libertà.

Realizzato in HRT, è la scelta ideale per i rider più audaci, che combina linee moderne ed aggressive ad un'ampia varietà di grafiche.

Un'altra caratteristica chiave di Twist è la sensazione di completa libertà grazie al peso di 1180 grammi: l'ampio campo visivo, il frontino regolabile, le ventilazioni frontali, posteriori e sul mentone con filtro antipolvere ne fanno un'eccellenza nel suo segmento. Il sistema DD ring completa il quadro di protezione di Twist.

Twist is the ideal helmet for the toughest off road tracks in total safety and freedom.

Made in High Resistant Thermoplastics (HRT) it is designed for the most daring riders, in a combination of modern and aggressive look and a wide range of graphics.

Another key feature of the Twist is the feeling of complete freedom thanks to a weight of just 1180 grams. The wide field of view, the adjustable peak and the front, rear and chin guard vents with dust filter, make this helmet a point of excellence in its sector. The double D-ring retention system completes the protection features of the Twist.

Twist è la scelta di campioni come Tony Cairoli, con disponibili i design da lui indossati in gara.

01. Posizione del frontino regolabile, per ogni stile di guida e condizione meteo.
02. Mentoniera con presa di ventilazione e design aggressivo.
03. Interni ad elevata traspirazione e comfort, rimovibili e lavabili.

01. Adjustable peak, for every type of riding style and weather.
02. Chin guard with vent and aggressive design.
03. Highly breathable, comfortable, removable and washable lining.

SWITCH

Airoh Helmet
2019 Collection

OFF ROAD

La passione per l'off road non conosce limiti, per questo Airoh Helmet® ha progettato Switch, il casco sviluppato per i più giovani.

Switch realizzato in HRT unisce leggerezza e resistenza in una forma compatta, moderna e pratica; gli interni, sono in tessuto ad alta traspirabilità e comfort. La comodità di Switch non finisce qui: un sistema di ventilazione frontali, posteriori e sul mentone unite al frontino regolabile assicurano il massimo comfort.

Un'ampia gamma di grafiche moderne, decise e di sicuro impatto visivo permettono ai rider di non passare inosservati.

The passion for off road knows no limits, this is why Airoh Helmet® has designed the Switch for young riders.

The Switch helmet model is made of High Resistant Thermoplastics (HRT). It marries lightness and protection in a compact, modern and practical helmet. The lining is in a highly-breathable and comfortable material. The optimum levels of comfort are ensured by a front, rear and chin guard ventilation system along with an adjustable peak.

A wider range of modern, sharp and visually striking graphics ensure that the riders stand out from the crowd.

01. Posizione del frontino regolabile, per ogni stile di guida e condizione meteo. **02.** Sistema di ventilazione con prese multiple per areazione interna. **03.** Sistema di ritenzione con anelli a doppia D per massima sicurezza.

01. Adjustable peak, for every type of riding style and weather. **02.** Optimised ventilation system for internal cooling. **03.** Retention system with double D-rings for maximum safety.

JUNIOR

01

02

03

Campioni si nasce, rider si diventa. Aviator J è il casco off road top di gamma per i giovanissimi che bramano di scendere in pista e di conquistare la fama.

Aviator J riprende tutte le caratteristiche dell'Aviator 2.2 indossato da campioni come Tony Cairoli, compreso il design della grafica. Questo casco vanta un perfetto bilanciamento di qualità e peso garantito dalla calotta in HPC, che permettono di avere la massima resistenza con un peso di soli 900 grammi.

Il sistema per la rimozione rapida dei guanciali di Airoh Helmet® (A.E.F.R) e il sistema D ring completano le dotazioni di sicurezza. Il comfort è garantito da un sistema di ventilazione articolato in prese d'aria frontali, superiori, posteriore e sul mentone, da interni estraibili, lavabili,

altamente traspiranti e dal frontino regolabile. Aviator J viene fornito con un kit di accessori con coperture per prese d'aria, la prolunga del frontino e tutti gli strumenti per effettuare le regolazioni ed adattare il casco alle specifiche esigenze del giovane rider.

Champions are born, riders are made. Aviator J is the top of the range off road helmet for the youngest riders, that can't wait get on the track and make their name.

The technical features of the Aviator J are identical to the ones found in the Aviator 2.2 worn by champions such as Tony Cairoli, right down to the graphics. This helmet is the perfect balance of quality and weight, thanks to the High Performance Composite fibre (HPC) shell, that allows for maximum protection in only 900 grams.

01. Sistema di ventilazione con prese multiple per areazione interna. 02. Sistema d'emergenza per la rimozione rapida dei guanciali (A.E.F.R.) 03. Kit d'accessori per regolazione prese d'aria e frontino.

01. Ventilation system with multiple vents for internal cooling. 02. Emergency cheek pads quick removal system (A.E.F.R.) 03. Accessories kit for adjusting air vents and peak.

ARCHER

Airoh Helmet
2019 Collection

OFF ROAD

Archer è il casco junior per chi non vede l'ora di "saltare in sella". Archer è realizzato in HPC rendendolo un casco estremamente resistente con un peso di soli 1150 grammi;

Gli interni traspiranti, rimovibili e lavabili, i sistemi di ventilazione frontale, superiori, posteriori, sul mentone e il frontino regolabile garantiscono un comfort ineguagliabile. Anche l'occhio vuole la sua parte: anche le grafiche di Archer esprimono appieno l'animo indomabile del giovane rider.

Archer is a junior helmet for riders that can't wait to hop in the saddle. Constructed in High Performance Composite fibre (HPC), Archer is extremely safe whilst weighing only 1150 grams.

Unparalleled comfort is guaranteed by the breathable, removable and washable inner lining, front, top and chin guard ventilation and the adjustable peak. The graphics designed for the Archer will please the most demanding of young riders.

01. Posizione del frontino regolabile, per ogni stile di guida e condizione meteo. **02.** Sistema di ritenzione con anelli a doppia D per massima sicurezza. **03.** Sistema di ventilazione con prese multiple per areazione interna.

01. Adjustable peak, for every type of riding style and weather. **02.** Retention system with double D-rings for maximum safety. **03.** Ventilation system with multiple vents for internal cooling.
