

Bikewear by Danish design, enhanced with GORE-TEX technology

GET LOST FIND YOUR ADVENTURE

Bikewear by Danish design, enhanced with GORE-TEX technology

For more than a thousand years vikings roamed the world and ruled the seas, making Denmark one of the most powerful countries in the world. Conquering unbound lands and braving new climates - it is said they discovered America long before Columbus - these pioneers knew how to harness the power of the elements and beat nature, allowing them to travel longer and further than anyone before.

Though they're gone a long time now, their DNA survived in more than one way. Dane Bikewear

sprouted from Viking DNA and evolved to let you conquer the world as our ancestors did a thousand years ago, using only the best materials like GORE-TEX, 3M™ Scotchlite™ Reflective Material and SAS-TEC protectors.

Dane bikewear is designed for riders who wish to beat all kinds of nature. Redefining borders based on quality, safety and protection, so adventurers in our time can go beyond all corners of the world.

Dane. Get lost.

All product information in this catalogue is subject to change, and not binding for Dane. Dane is not held liable for any mistakes in printing, typographical errors and/or translation. Not all colors and/or versions are available in all countries and Dane reserves the right to make alterations and improvements to their products without any obligation to give prior notice or to carry out changes to products already sold.

Detachable collar
Dane is created to beat nature. Detach the collar in hot weather, or attach it when in colder climates.

Air vents
Zip open for extra ventilation.

Protection
Dane uses only the best quality adjustable CE protectors with high-grade shock-absorbing qualities.

Visibility
The high quality 3M™ Scotchlite™ Reflective Material used in Dane apparel enhance visibility in the dark and at dusk thanks to their intense reflective properties.

Stay warm
Removable thermal insulation made of DuPont™ Comformax™ and Cynix® 3F.

GET LOST IN QUALITY

Dane clothing offers additional protection through the use of highly wear-resistant materials on the most vulnerable areas, together with CE protectors.

Dane uses 1000D Cordura® or HDM Superfabric®, for example on products with GORE-TEX, while GORE-TEX ARMACOR™ is Dane's preferred choice for GORE-TEX Pro products.

OUR SECOND NATURE IS BEATING NATURE

Each year we subject new products to extensive practical testing, involving thousands of kilometers in all possible weather conditions, before putting them into production. The results and the experiences of our test riders are passed back to the designers, who then make small alterations to the garments, if required, in order to achieve a perfect fit and optimum

performance. This makes Dane products extremely comfortable and of superb quality. Dane therefore performs very well in independent comparative product tests, often emerging as the test winner.

You can read more about materials on page 6-7 and on various product pages.

High performance waterproof & breathable membrane

GORE-TEX

GORE-TEX products are well known for providing long-lasting, comfortable weather protection you can trust from your head down to your toes. The GORE-TEX membrane is at the heart of all GORE-TEX products. Due to its microporous structure it has its amazing characteristics.

In addition the different GORE-TEX product technologies offer unique solutions for specific activities and climate conditions to fit your individual needs. Some of the most important product technologies used in the prime Dane products are:

Standard GORE-TEX 3-Layer fabric construction

GORE-TEX products – Everyday versatility

Durable waterproof and windproof products, combined with optimised breathability that maximize protection and comfort for the wearer. There are three basic GORE-TEX laminate constructions; The one you can find at Dane GORE-TEX products is the Z-Liner construction. For this a GORE-TEX membrane is bonded to a lightweight fabric. This Z-Liner is then freely suspended between the outer fabric and the lining.

GORE-TEX PRO

GORE-TEX Pro products – Engineered for the extreme

GORE-TEX Pro products are always made with 3-layer GORE-TEX Pro fabrics and are built for maximized ruggedness which are ideal for extreme and extended use. The fabric's construction keeps your body dry by reducing the accumulation of sweat, so you remain cool during aerobic activities and warm during cool-down. Made to meet the high demands of serious outdoor enthusiasts

All products engineered with GORE-TEX product technology carry the GUARANTEED TO KEEP YOU DRY™ promise.

GORE-TEX ARMACOR Product Technology

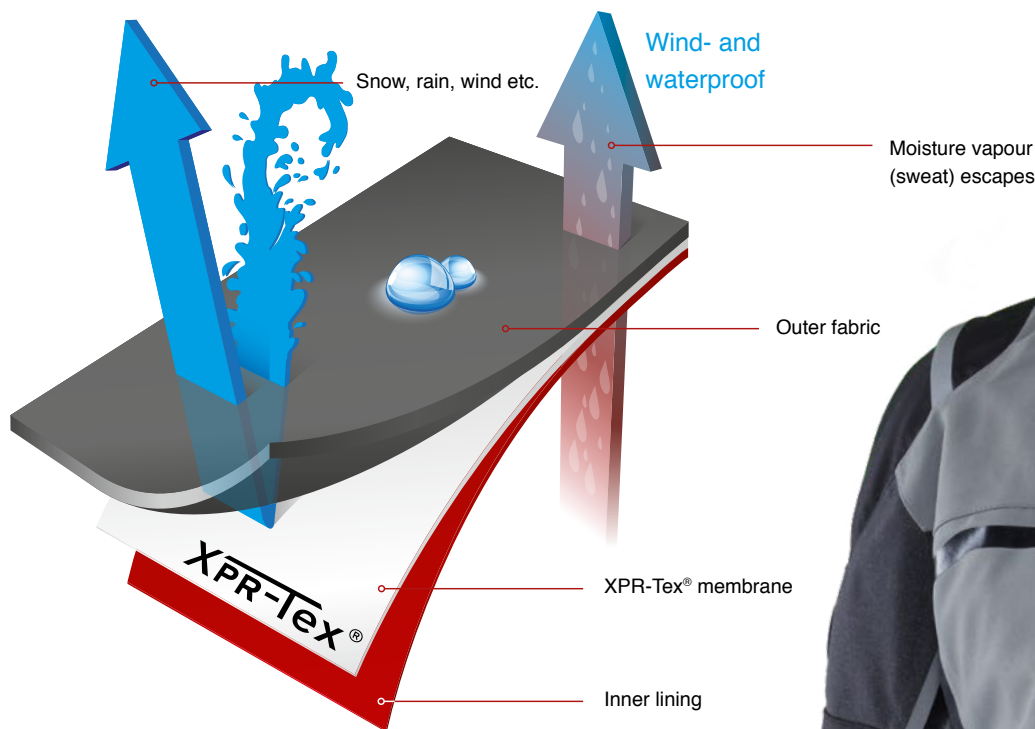

Thanks to its patented lattice structure with an integrated Kevlar® core this technology offers extreme tear and abrasion resistance yet lighter weight. Incorporated into a GORE-TEX Pro motorcycling jacket, it will protect enthusiastic motorcyclists in the event of a fall. This means safety and enhanced comfort – in all weather conditions.

KALSOY p13

See GORE-TEX.com for more information about this membrane.

XTREME PERFORMANCE

XPR-Tex®: Extreme Performance Textile

Meet your new road armor: High performing waterproof & breathable membrane XPR-Tex® is a perfect partner on the road. Keeping out wind and water, XPR-Tex® lets your body breathe, while keeping warmth between you and your jacket.

XPR-Tex® is used as Direct Laminate in Dane jacket **HOLSTED** (p16), pants **RINGSTED** (p17) and glove **VIBORG** (p46).

XPR-Tex®

The benefits

- 100% Wind- and waterproof
- Breathable membrane
- Resistant to high and extremely low temperatures

ICON SHORTLIST

POWERTECTOR™
Shock-absorbing protective body armor.

SAS-TEC
High quality shock-absorbing protective body armor.

mcFIT
Waterproof seal between jacket and glove.

3M™ Thinsulate™
Light and warm synthetic insulation.

INVISTA CORDURA®
Durable tear and abrasion resistant material.

ARMACOR™
Extremely strong tear and abrasion resistant material. Used in combination with GORE-TEX PRO.

Reflective material

GORE-TEX Infinium™
windstopper technology. Water resistant, windproof and highly breathable.

GORE-TEX Pro
Direct laminate. Extreme water- and windproof and breathable membrane.

GORE-TEX
Z-Liner construction. Extreme water- and windproof and breathable membrane.

XPR-TEX®
Water- and windproof and breathable membrane.

Unisex
Clothing & accessories for both men and women.

Men
Clothing & accessories specially designed for male proportions.

Back protection
Back Protector certified to EN 1621-2.

Women
Clothing & accessories specially designed for female proportions.

Elbow, shoulder and knee protection
Protectors certified to EN 1621-1.

Rainblocker®
Waterproof ventilation zip.

Protection Level 2
Protectors certified to EN 1621-1 Level 2.

Touchglove
Allows for the operation of touchscreens while wearing gloves.

Storm Cuffs®
Waterproof seal between jacket and glove.

Visor wiper
Glove with visor wiper.

Thermal lining jacket
Removable thermal lining to prevent heat loss.

Safety Belt®
Prevents jackets from riding up.

Removable climate jacket
Removable all-climate jacket.

Detachable suspenders
Connecting option for braces.

Thermal lining pants
Removable thermal lining to prevent heat loss.

Connection Zipper
Enables jackets and pants to be connected by a zip.

Removable climate pants
Removable all-climate pants

Genuine Leather
Product made of genuine leather.

Reflection
Reflective materials have been incorporated in this product.

Leather / Textile mix
Product made of genuine leather and textile.

3D_Mesh zones
Improved breathability due to the material's open structure.

Summer
Products designed for warm conditions.

Ventilation
Ventilation options.

Winter
Products designed for cold conditions.

Wind- and waterproof
100% waterproof, keeps both wind and water out.

All-Weather
Products for any weather conditions.

Wind- and waterproof, and breathable
Equipped with a windproof, waterproof and breathable membrane or coating.

Oil- and fuel resistant
Soles are oil- and fuel-resistant.

Bikewear by Danish design, enhanced with GORE-TEX technology
